

49X WESTERN STAR TRUCK

The X-Series Cab

Designed for the vocational operator

Steel-reinforced aluminum cab designed using advanced topology optimization ensures toughness and durability, while reducing weight.

Innovative cab mount system for optimal stability and reduced operator fatigue.

Designed for ergonomic ingress and egress, 70 degree door opening, five hand holds, and optimized staircase step design.

Composite trench-style low roof for optimized over-cab equipment placement for lower cab height, while maintaining a large opening for operator ingress and egress.
